An investment in your success

Get Cooperized™

As an executive, you are among the top performers and highest achievers in your organization. As such, your organization has made your health and well-being a priority by providing you with a comprehensive preventive physical exam renowned worldwide.

Welcome to Cooper Clinic Executive Health.

Named one of the top destinations for a comprehensive physical exam by *Fortune* magazine, Cooper Clinic, through its Executive Health exam, identifies potential health problems; reduces and eliminates medical risk factors; and provides you with an individualized road map to optimal health.

At Cooper Clinic, preventive medicine isn't just something we do.

It's all we do.

The very notion of preventive medicine as a science was pioneered by Kenneth H. Cooper, MD, MPH, in 1970 when he founded The Cooper Institute® research and education nonprofit followed by Cooper Clinic later that same year.

"Two close friends of mine suggested I come to Cooper Clinic. That advice literally saved my life by detecting a mass on my pancreas. I'm alive today thanks to Cooper Clinic."

– Thomas V. Rushing, Houston, Texas

The Cooper Clinic Executive Health exam isn't just complete—it's comprehensive. And includes a series of in-depth medical assessments, health screenings and diagnostic imaging tests—all customized based on age, gender and medical history. Each component is based upon the latest in science, technology and research.

As a busy executive, your time is invaluable. We've engineered the exam so all tests are completed in one day. With same-day results and plenty of time built in for one-on-one consultation with your Cooper Clinic physician—up to two hours if needed.

At day's end, you will have a clear picture of your health that will provide you with more essential insight into the state of your well-being than all your previous exams combined. Following your exam, you'll receive a written report by mail and have access to your results through our online Patient Portal.

Nearly 50 years of preventive medicine research at Cooper Clinic and The Cooper Institute® have proved a healthy lifestyle improves the quality and quantity of life.

Individuals who are fit at midlife have:

45% ↓ Fewer chronic diseases in their Medicare years and spend less time with these diseases; men with the highest fitness levels had a 45 percent lower incidence of chronic disease compared to those with the lowest fitness levels, and women had a difference of 43 percent

↓ 43%

**36%
LESS
LIKELY** A lower risk of developing Alzheimer's disease and other dementias in their Medicare years; the highest-fit individuals are 36 percent less likely to develop dementia compared to the lowest-fit individuals

**40%
LOWER
COSTS** Reduced health care spending in their Medicare years; high-fit individuals showed 40 percent lower average annual health care costs compared to low-fit participants

What's more, a review of 240,000 Cooper Clinic patients who regularly had a physical exam showed men lived 13 years longer, and females lived seven years longer than the average life expectancy!

Improving how you live will improve how well you live. And an annual Cooper Clinic preventive exam is your first step toward living a longer, healthier life.

"I thought I was healthy, but a Cooper Clinic exam revealed four blockages around my heart and two tumors in my right kidney. The exam literally saved my life."

- Bart Mize, Corporate Client, Knoxville, Tennessee
